[00:00:00.00] Logo, Bissell. Text, Bissell Pro Heat 2 x Deep Clean Lift-Off Emptying Dirty Water Tank.

(SPEECH)

[00:00:05.89] You'll need to empty the dirty water tank after use of the ProHeat2x Lift Off. Here's how you do it. Raise the handle up and lift the dirty water tank from the pod. The tank lead needs to be removed in order to empty and rinse. Rotate the handle all the way to the other side of the tank.

[00:00:23.33] Remove the lid to dump out the dirty water and watch the amount of mess you're ProHeat picked up go down the drain.

(DESCRIPTION)

[00:00:28.82] A person dumps the dirty water down a sink, then rinses.

(SPEECH)

[00:00:32.21] Rinse your tank for good measure. If you are all done cleaning and about to put your machine away, clean the red filter on the pod using a towel or rag. Replace the lid to your newly cleaned tank and re-seat it back onto the pod. Your ProHeat2x lift off is ready to continue cleaning or store for future use.
